

ArbiMed Retina

Dose Tracking Software

Track all of your injectable inventory and more

Helping at Each Step of Your Inventory's Journey

Track Every Dose

- From the time you create an order, until you dispense it to a patient, and beyond.

Easy Access to Detailed Reporting

- Run reports and access valuable inventory data in real-time, on your own schedule. No requests or waiting.

Ensure Proper Billing and Payment

- Integrated with your practice management software to generate billing and payment reports.

Freedom to Choose Any Vendor

- Protect your buying power and work with the vendors that best fit your practice.

As featured in Retinal Physician Magazine

A Proven and Fully Integrated System

Physicians

Transferring data from your practice management system streamlines your clinic's workflow, so you can treat more patients.

Technicians

Advanced alerts help you assign the right drug each time and more accurately document encounters.

Administrators

Easily transfer drug, create PO's, monitor stock levels, perform end of day counts, and track expiration dates at each individual location.

Accounting and Billing

Detailed reports help monitor reimbursement and also detect inaccuracies in billing and coding.

What Retina Practices Are Saying

"ArbiMed is a very intuitive program and easy-to-use... The ArbiMed team is always there to respond to our calls and answer our questions."
